View 3 Stove

A contemporary stove for smaller rooms

The View 3 is the smallest of the View stove range and is recommended for burning multi fuels only.

This stove is approved for use in smoke control areas. It has a cast iron door and large glass window to enjoy the burning flames. There is an optional extra of a glass top plate for a more contemporary look, and the plinth has a glass front as standard.

Wood can be burned on this stove, but will not burn as efficiently as other models, such as the larger View 5 stove, which are available as woodburning versions.
