Riva 76

The largest cassette in the Riva™ range

A wood burning model only, the largest cassette in our range offers not only a truly panoramic view of the flames but also provides you with powerful heating performance. Additionally, its larger dimensions make the Riva™ 76 particulary suited to new, architect-designed homes or where renovation work to an existing, larger property is being considered.

As with the Riva™ 55 and Riva™ 66, the 76 is complete with an 'Opti-Burn' setting for maximum fuel efficiency. However, it can also be specified with a fan-assisted convection kit and a ducting system as an additional option. The fan-assisted convection kit provides an immediate boost of warm air into the room at the touch of a switch whilst the ducting system allows you to distribute some of the heat to other parts of the same room or to adjacent spaces.

Both the cassette fire and the frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. There are also four additional frame colour options available.
