The space in which you live is an expression of your individual style - and at the very heart of your home is the fireplace.

The fireplace is a focal point that family and friends will gather around. It also offers you the opportunity to make a design statement that marks out the room even when the fire is not lit.

Many of today's contemporary fires, whether gas-fired or woodburning, are designed to fit into an existing chimney breast or specially built studwork structure. Accordingly the wall itself can be used to enhance still further the impressive appliance you have already chosen.
