Stockton 14HB Boiler Stove

Designed to supply your hot water and central heating requirements

Stockton boiler stoves can supply your domestic hot water and central heating requirements or you can use 'link up' technology to allow a Stockton boiler stove to augment your existing central heating system.

Whatever your choice, you will enjoy all the atmosphere of a real fire and exceptional heating performance for other areas of your home.

The Stockton 14 Boiler stove can provide up to 7.0kW of heat to a room and up to 14.0kW of heat to a boiler. It is capable of supplying 19 standard sized radiators. This model is available in both woodburning and multi-fuel versions.

Alternatively, you can 'link up' a Stovax high output boiler with your existing heating system to reduce your reliance on gas or oil. There are ways to link with conventional oil or gas central heating systems, combi boilers, underfloor heating and even solar panels.

We recommend reading our further information page before discussing your requirements with a qualified heating engineer.

Boiler stove colour choices: Matt Black, Metallic Blue, Metallic Brown and Metallic Green.

From 1st July 2013 it became a mandatory requirement to have a Thermostat fitted to all boiler stoves. Therefore from this date, all Stovax Boiler stoves now come supplied with a Thermostat as standard.
