Studio Edge Gas Fire

Minimalist, modern perfection

This stunning 'hole in the wall' fire creates a visual delight in any living space. Its central feature is a modulating single ribbon of living flame that dances above a bed of white stones or glass beads or through a realistic log-effect display. Additionally, any white stone models can be retro-fitted with any of the red, clear or black glass bead fuel effect options to create a new stylish look.

The Studio Edge is for those who require minimalist modern perfection. The fire has an eye-catching no frame* design, with the option on the Open Fronted Studio fires of a polished black granite interior lining. The mirror-like qualities of this lining reflect the continous motion of the flames. Glass Fronted versions that incorporate the white stone and glass bead fuel beds have enamelled linings as standard.

*No-frame refers to added exterior frames, Glass Fronted Studios have an additional 27mm inner frame that secures the glass window in place.

Linings: Black Steel (Open Fronted Standard), Polished Granite (Open Fronted Upgrade), Black Enamel (Glass Fronted - White Stones or Glass Beads), Black Reeded (Glass Fronted - Logs) and Vermiculite (Glass Fronted - Logs)

Fuel Beds: White Stones, Glass Beads - Red Clear or Black and Logs (Glass Fronted only)

Command Controls: Left (Sequential remote - Open Fronted) and Right (Thermostatic remote - Glass Fronted)

Studio Edge Gas Fire – Key Facts
