Riva Vision Electric Stove

Contemporary electric stove

The Riva Vision is a contemporary, electric stove that comes in two sizes: Small and Midi; each sporting a highly reflective black glass door, integral glass plinth, black glass top plate and contrasting stainless steel detailing for a clean stylish look.

Incorporating an eye-catching effect created using Gazco's unique Veriflame™ technology, the Riva Vision's alluring visuals glow over a realistic hand painted log-effect fuel bed to give all the ambiance and depth of a rear log fire.

The three brightness levels can be easily altered with just the touch of a button on the remote control to create a look to suit your mood. There is even a blue flame-effect setting that adds an extra visual dimension to the highest of the brightness levels and helps to increase the overall realism of this stunning fire. Furthermore, each level is available with or without the 1-2kW of heat output, so you can enjoy the ambiance created by your electric stove whatever the season!

To increase your interior design possibilities, you can enhance your Riva Vision electric stove by choosing from one of ten stylish Riva Benches.
