Riva2 670 Verve XS

Striking electric fires

The Verve XS offers the same subtly curving form of the larger Verve frame but with slimmer proportions to suit narrower walls or spaces.

The Verve XS comes in smart Graphite or can be finished in one of four striking additional colour options to suit your interior tastes. The highly realistic fuel bed is enhanced by Gazco's stunning flame-effect, offering all the ambiance of a real log flame in the modern convenience of a high efficiency electric fire.
