Riva 40 Multi-fuel Fire

Giving you more heat for your money

The smallest model in the Riva™ Cassette range has been specifically designed to fit into a standard 22" (560mm) high x 16" (405mm) wide British fireplace opening with the chairbrick removed. So you can now update the look of your living room with minimal construction work and, possibly without even the need to remove the existing hearth and mantel. Alternatively, the Riva™ 40 can be installed as a "hole in the wall" fire.

In addition to providing excellent contemporary style, installing a Riva™ 40 significantly increases the level of heat in your room when compared to a conventional open fire. Combustion efficiency is up to four times greater; giving you more heat for your money and lower fuel costs.

Both the cassette fire and frames are finished in a choice of Stovax's Storm or Jet Black Metallic paints. However, there are four additional frame colours options available to expand your interior design possibilities. The Riva™ 40 is also approved for the burning of wood in Smoke Control Areas, so this compact and contemporary cassette can add style to your home, wherever your location.

Riva 40 – Key Facts

Overall dimensions	492 x 599 x 350mm (w x h x d)*
