Stockton Double Stove

Enjoy twice the comfort and twice the view

Enjoy twice the comfort and twice the view of your fire with a Stockton double sided stove.

Using one central chimney, the doors to both the back and the front of the stove are designed to open into adjacent rooms. So, compared to individual stoves in each room, you have less work refuelling and even more of a focal point to your home.
There are two sizes from which to choose - Stockton 8 Double and Stockton 11 Double.

Although this double sided configuration does not allow the incorporation of full cleanburn technology, both stoves still include an airwash system to keep the glass clean.

The smaller Stockton 8 will provide you with a significant heat output, up to 9kW, whilst the 11 Double produces and even more powerful 11kW.

Otherwise the two models have exactly the same specifications as their single sided equivalents.

Colour choices: Matt Black, Metallic Blue, Metallic Brown, Metallic Green.

Stockton Double – Key Facts
