Riva 53 & 67 Designio Gas Fires

A design statement in its own right

A design statement in its own right, the Glass Fronted Designio gas fire has the style to appeal to the widest range of contemporary interiors - and a performance to match. These realistic gas fires are teamed with an exceptionally efficient convection system that produces up to 5.3kW of heat which can be controlled from a choice of optional remote controls.

All gas Riva 53 and 67 models come with manual operation and the option to upgrade to a Standard remote control (allowing you to adjust both the flame height and heat output) or the Programmable remote control (with additional thermostatic and timer functions).
