VFC Tapered

An exceptional real look fire

A VFC Tapered fire replaces an open fire in a standard *chairbrick* fireplace to offer comforting radiant heat and a *real fire* look. All with the convenience of gas and the option of a remote control.

VFC technology allows you to select the exact balance of flame, glow and heat. Set to *Blue* and the coals glow brightly with a lower, translucent flame and a hint of blue. Set to *Yellow* and you will enjoy a yellow, flickering flame and atmosphere of a genuine fire.

The fire is available in two widths and a choice of Arts, Holyrood or Spanish fronts, in a variety of brass and cast iron finishes.

VFC Tapered – Key Facts
