Victorian Tiled Convector-

The ultimate marriage between traditional style and modern efficiency

Timelessly elegant, the period design has been so subtly revised that you will hardly notice. What you will appreciate however, is the added economy of convected heat whether using solid fuels or a gas fire.

Choose from traditional matt black, highlight polished or fully polished finishes.

The convector fireplace draws cool air through the grate, heats it in a convection chamber and diffuses it into the room through an out let above the hood. The result is a heating efficiency twice that of a traditional open fire.

Victorian Tiled Front – Key Facts
